

ICAS 2026 Booth Draw

End Cap Restrictions

The floor plan is designed with in-line booths. When you select two booths at the end of an aisle, the in-line booth requirements are still in effect.

The yellow shaded area is subject to a maximum height restriction of 4 feet. The green shaded area is subject to a maximum height restriction of 12 feet. Standard rear pipe and drape (indicated by the black lines at the back of each booth, and only in the green shaded area) is provided at a height of 8 feet. Exhibitors whose displays exceed 8 feet in height must order 12-foot rear pipe and drape through Freeman Exhibit Services.
